the coupon on Page 7.

New York Susquehanna & Western #142, the first steam train engine to travel south from Binghamton, NY through the Upper Delaware Valley in a quarter-century, hooked up with the Chesapeake & Ohio #614 to perform several full power, "double-header" run-bys of the Port Jervis Depot to the thrill of crowds Oct. 16-18. Hosted by Iron Horse Enterprises, #614 has carried passengers on the 160-mile trip from Hoboken, NJ. to Port Jervis for the past two fall seasons. Promoters would like to see more excursion trains offered in the future. (Soete photo)

## Steam Trains Converge

While steam trains yielded to more efficient diesel locomotives in the early 1950's, the mighty "iron horses" have been enjoying a resurgence of attention in the Upper Delaware River Valley through recent activities and historical accounts.

X This past autumn brought the return of the "Iron Horse Rambles" to Port Jervis (see above), showcasing the tourism catalyst potential of the city's restored electric turntable.

X 1998 marked the 150th anniversary of the completion of the Delaware Division of the Erie Railroad (now Conrail and soon to be Norfolk Southern). National Park Service Historian Mary Curtis recounts the tale of the "Old Weary Erie" - with all its controversies, characters, innovations, and disasters - in the Fall '98 issue of *Kaatskill Life* magazine.

X Did D & H Canal Co. officials conspire to cover up the alleged explosion on July 26, 1829 of the first steam train tested in the U.S., preceding Honesdale's famous "Stourbridge Lion"? So suggest John Demos and Robert Thayer in "The Case of the Vanishing Locomotive," claiming to discover the mysterious fate of "The America" (*American Heritage*, October 1998). ❖

**Most land along the Upper Delaware River is privately owned. Please be considerate and don't litter or trespass. Thanks!**

# Representative Profile: John S. McKay

With a strong family stake in the Upper Delaware River corridor dating back to the 1840's, Upper Delaware Council (UDC) 1999 Vice-Chair John S. McKay feels compelled to get involved.

He has served on the Lackawaxen Township Board of Supervisors since 1988 and sat for 10 years prior to that on the Township's Planning Commission.

McKay joined the UDC in late 1988 as an alternate, took over as Lackawaxen's representative in 1994, and filled the role of Council vice-chair in 1995.

"I believe in service to your community. I also have a vested interest to keep abreast of issues," he says.

The vested interest McKay acknowledges stems from his multiple, ambitious business endeavors.

### His Own Boss

A nationally certified tree farmer, McKay maintains 1,150 acres of wooded property including two miles of Delaware River frontage around the village of Mast Hope. He and his wife, Jane, are the proprietors of the Sylvania Tree Farm Guest Cottages. Under the banner of McKay Enterprises (also his [www.com](http://www.com) address), John has designed and built several log cabins and Adirondack-style homes and cottages for purchase or rent. Logging, timber harvesting, and bluestone quarrying are also in his self-employed repertoire.

McKay, 45, grew up in Chevy Chase, Maryland. His family vacationed at Mast Hope and, while he was in college, McKay found summer work at nearby Camp Colang. He recalls his time at the camp as an apprenticeship for his later building endeavors.

Since McKay's great-great-grandfather, James Salden, had a large hand in creating the community of Mast Hope, it was natural that McKay would settle there to carry on the legacy of stewardship.

### Call of the Wild

That came after his 1976 graduation from Georgetown University, where he concentrated on Liberal Arts and French Language. He considered a career in law or architecture, but the natural beauty and recreation potential of Mast Hope beckoned.

After a brief stint working at the Library of Congress in Washington, McKay moved with his wife Jane to the family property at Mast Hope in 1978. His first job as a full-time resident was with the Pike County Historical Survey project. A 13-volume, illustrated collection was ultimately published under the supervision of Pike County Historian George Fluhr.

McKay focused on the development of Sylvania Tree Farm (poetically, "Sylvan" is

John S. McKay, Lackawaxen Township (a spirit of the forest) and his wood products business through the mid-80's.

In rehabilitating some dilapidated structures on the family estate, McKay then became interested in custom home construction. His design ideas often come from local architecture in the Delaware Valley, with rustic touches such as wide plank wood floors and bluestone fireplaces. McKay prides himself on building structures that suit their surroundings both architecturally and in their relation to the landscape.

John, Jane, and their three children - Nicholas, 12; David, 10; and Elizabeth, 7 - live in a converted, former one-room schoolhouse situated near their five-year-old guest cottages.

### UDC Balances Interests

Along with his responsibilities to his family, businesses, and township, McKay sees a definite benefit to Lackawaxen's participation in the Upper Delaware Council.

"The board we have right now is certainly of a mind that this coalition is our best opportunity to balance the interest of the federal government with home rule. It's a good arrangement and it's worked out well," he says.

McKay believes that the framers of the River Management Plan for the Upper Delaware Scenic and Recreational River, those members of the Conference of Upper Delaware Townships (COUP), laid the solid foundation from which all successes of the UDC have sprung.

"The people involved in COUP are the ones that really did the work. They were the real watchdogs. They're the ones who deserve the credit," McKay says. ♦

# D&H Canal and Gravity Railroad: A Coal Mine or a Gold Mine?

By Lori Danuff McKean  
D & H Trek Coordinator

Though the D&H Canal and Gravity Railroad hasn't been used for its original purpose of hauling coal from Carbondale, Pa., to the Hudson River at Kingston, N.Y., in 100 years, it is actually alive and well, according to an adventurous group of supporters who recently traveled the entire length by bicycle.

Participants in the "Coalfields to Tidewater" Centennial Trek, held October 9-12, 1998 and organized by the D & H Transportation Heritage Council, were treated to the 'sites' and sounds of this remarkable engineering wonder as they recaptured the spirit of the D & H Canal and Gravity Railroad's heyday.

In completing this journey, they accomplished two things.

First, they delivered a piece of coal - the first to travel the route in 100 years - from Carbondale to Kingston, a symbolic gesture that commemorated the important role the canal had, not just in shaping the communities along the way, but the nation's industrial era.

Second - and perhaps more importantly - the trek refocused attention from the demise of the D & H to the future of the canal and gravity railroad as a viable cultural and historic resource.

Indeed, photographs, maps and extensive field notes were taken throughout the trek. Gene Woock, a natural resources specialist with the National Park Service in Philadelphia, accompanied the trekkers to do a visual inventory and assessment of the archaeological, cultural, historical, natural, recreational, and scenic qualities of the entire D & H Canal and Gravity Railroad corridor.

This inventory will lead to a series of corridor plans that will identify all outstanding features with a focus on preservation, interpretation, and signage.

"What struck me while we were on the trek was the enormous amount of people spending their time and money preserving and interpreting their small sections of the corridor," said Woock. "What we need to be able to do is tell the whole story no matter where somebody comes into the corridor. We want the story to flow through the canal just as the water did.

"There's a lot of disconnection now," he added. "If somebody wanted to drive, hike or bike through there now, they would not be able to get the whole picture."

Participants in the D & H Canal Trek parked their bicycles in Honesdale, Pa. to visit the Wayne County Historical Museum, which was the original office of the Delaware & Hudson Canal Company. PA State Representative Jerry Birmelin, on the ground at far right, paid a visit to several of the Trekkers on Day 1 of their journey October 9. Pictured from left to right are Sandra Schultz, Lori McKean, Bethia Waterman, Karl Beard, Tom Frost, Joseph Brophy, and Cal Hite. Absent from the photo was Canal Trekker Glenn Voss. (Ramie photo)

In the Upper Delaware River corridor, this could spell economic opportunity and ecotourism possibilities in communities that are struggling to survive. Public access to towpath and canal remnants already exists in such communities as Lackawaxen, Minisink Ford, and Pond Eddy. Just beyond the river corridor boundaries, canal communities like Hawley and Honesdale could benefit greatly from a D&H Canal tourism promotion. And the National Park Service has already made tremendous strides toward preserving the famous Roebling Aqueduct and with interpretation of the Old Mongaup Village remnants.

#### Can "Adaptive Re-use" Work Here?

There is no question: The D&H Canal and Gravity Railroad is an educational, historical, cultural, and natural resource in the Upper Delaware River Valley.

All along the trek route, communities, organizations, and individuals welcomed us with open arms. From marching bands to homemade chocolate chip cookies, contributions along the way demonstrated the depth of commitment and desire to hold

onto a piece of our history, indeed, to use this history as the cornerstone for our future.

Dedicated and enthusiastic people live and work in communities from the coalfields to the tidewater. Historical societies recognize the importance of the canal and work tirelessly to share their knowledge with residents and visitors. Individuals who purchased locktender cottages and property with sections of the towpath have painstakingly restored their private homes and maintained their yards to preserve their little piece of history. Great-granddaughters of canal boat owners and great-grandsons of canal boat builders enthusiastically shared a fading photograph or some other memorabilia that had been tucked away for years among family treasures.

What we learned - and want to share - is that sometimes we don't have to build or create something new to improve our world. We don't always need a gimmick or

Please see "Canal Trek" on Page 8

# Nominations Sought for UDC Awards Banquet

Do you know of an individual, group, municipality, or government agency which made a notable contribution to conservation of the Upper Delaware Scenic and Recreational River or the general quality of life in the river valley during 1998?

The Upper Delaware Council wants to hear about them!

Nominations are being accepted for the UDC's 11th Annual Awards Banquet. While the date and location of this popular event were tentative at the time of this publication, the dinner has traditionally been held on a Sunday afternoon in April. In 1999, the host facility rotates to Pennsylvania. Press releases and invitations will be issued as plans are finalized.

The UDC will present competitive awards in nine categories, as follows:

**Distinguished Service** - to an individual who has acted with distinction in support of the goals and objectives of the River Management Plan.

**Community Service** - to a person, community or group that took direct action to protect the river corridor and its resources.

**Robin Daniels Memorial Lifesaving Award** - given when applicable to individ-

uals or organizations whose heroic actions saved life or lives in the past year.

**Cultural Achievement** - to a person or organization whose work enhanced, interpreted, or promoted the Upper Delaware's cultural resources.

**Outstanding Community Achievement** - to the town, township, or county which acted to protect the river corridor.

**Recreation Achievement** - to an organization which made an outstanding effort to educate river users, or contributed to river safety and management.

**Partnership Award** - to a government agency for instituting new programs or

policies in support of the River Management Plan and its efforts.

**Volunteer Award** - to individuals or organizations who donated their time and energy to enhance the corridor's quality of life or conservation.

**Award of Recognition** - to individuals who have made significant contributions to improving the river valley's communities and resources.

To submit a nomination for consideration, obtain a list of past recipients or be placed on the invitation mailing list, contact UDC Public Relations Specialist Laurie Ramie at (914) 252-3022. ❖

## Eagle Observers Ready for Winter

The Eagle Institute is currently seeking volunteers for its winter eagle monitoring and education programs, according to Lori McKean, executive director.

Dedicated to the protection of the bald eagle and conservation of the eagle's habitat, this new, not-for-profit organization will be providing slide presentations, guided habitat field trips, children's programs in area schools, and a volunteer monitoring and interpretive winter program through mid-March.

In addition, brochures will be made available throughout the Delaware River and Mid-Hudson Valleys to teach proper eagle viewing etiquette and to help make sure eagle

viewing is conducted in the least intrusive and safest manner.

In recent years more than 100 bald eagles have been known to migrate to this region in winter in search of open water, fresh fish, and undisturbed stands of trees where they can safely perch and roost. Most eagles leave the area by mid-

March, heading back to their breeding territories north of here and in Canada. However, the breeding population in this region continues to grow every year, with more eagles staying and building nests.

Eagle Institute volunteers are stationed at sites such as the Delaware River at the confluence of the Lackawaxen River and at the eagle observation blind on County Road 42 in Forestburgh, NY. If possible, the organization would like to have enough volunteers to staff other viewing locations along the Upper Delaware River and at various reservoirs.

The volunteers collect data about the eagles and the visitors that can help shape future planning and policy decisions. Volunteers also can help give guided tours, provide programs, and staff the field office located in Lackawaxen, Pa. near the Roebling Bridge.

Since its incorporation in January 1998, the Eagle Institute has worked diligently toward establishing a presence in the region. An Advisory Board made up of representatives of the New York State Department of Environmental Conservation, the Pennsylvania Game Commission, National Park Service, Upper Delaware Council, and others helps to guide the decision-making and provide technical expertise and input.

"We have received tremendous support from all those who share our common philosophy and goals," said McKean. "For example, the National Park Service is providing office and meeting space for the Institute; the DEC is helping with insurance and data processing; Orange & Rockland Utilities gave us funds to purchase binoculars and spotting scopes; Sullivan County provided the means to print a brochure and a grant for start-up costs; IBM is contributing a computer; and the Upper Delaware Council is providing money for an educational pamphlet [through the Technical Assistance Grant program]."

For information on volunteering, becoming a member, or contributing to The Eagle Institute, call (914) 557-6162, write to P.O. Box 182, Barryville, NY 12719, or e-mail at eagleinstitute@yahoo.com. ❖

## Governors to Convene Watershed Conference

With the goal of creating a shared vision for the future of the Delaware River Watershed, organizers from four states are planning a groundbreaking Governor's Summit Conference for late spring, 1999.

The Heritage Conservancy's Delaware River Watershed Initiative and the Delaware Estuary Program, along with partners in Pennsylvania, New York, New Jersey, and Delaware, are leading the comprehensive, coordination effort.

On the first day of the conference, information will be shared about the state of the Delaware River and the activities of its stewards. The second day will be devoted to discussion of various issues in river conservation, striving toward watershed-wide implementation of solutions. For developing details, contact The Heritage Conservancy at (215) 345-7020. ❖

**New Area Code in PA**  
As of April 7, 1999, dialing 717 to reach folks in northeastern Pennsylvania will no longer be correct.  
A new area code of 570 was introduced in December, 1998 for all PA Bell Atlantic customers north of Harrisburg to the New York border. The 717 phase-out is taking place over a four-month period.

# Heritage Thrives In Upper Delaware

If the remarkable coincidence of historic anniversaries collected under the banner of "Celebrate '98" revealed anything about the Upper Delaware Valley over the past year, it's that residents are eager to pay tribute to the past.

Emily Paulsen, president of the Upper Delaware Heritage Alliance which provided invaluable assistance in promoting the wealth of "Celebrate '98" events in its five-county NY and PA region, believes that the enthusiasm doesn't have to end with the new year.

She encouraged the 80 guests present at the Upper Delaware Heritage Alliance's (UDHA) Awards Dinner held October 4 in Eldred, NY to keep the momentum going.

"What we do is contagious. The more we do, the more that happens. Our impact is a lot bigger than this room," she said.

Gathered together were representatives of historic societies, creative arts, government, business, UDHA members, and well-wishers to applaud the often overlooked efforts to enhance appreciation of the Upper Delaware's heritage.

For the second year, the UDHA also presented the Tom Hill Award for Excellence in Public Service in honor of the late Town of Lumberland Supervisor and Upper Delaware Council (UDC) representative. The award is reserved for elected officials or governments, agencies, and employees.

The 1998 recipient of the Tom Hill Award for Excellence in Public Service, Upper Delaware Council Town of Cochecton Representative Larry Richardson, poses with his daughter, Erin, who nominated him, at the Upper Delaware Heritage Alliance's Awards Dinner Oct. 4 in Eldred, NY.

Fellow UDC representative, Mr. Larry Richardson of the

Town of Cochecton, received the award thanks to a heartfelt nomination from his teenage daughter.

Fifteen-year-old Erin Richardson detailed her father's service to his community and church. He's a Councilman and Deputy Supervisor for Cochecton, a former Planning Board member, treasurer of the Cochecton Preservation Society, member of the Cochecton Democratic Club, and a 1993 chairperson of the UDC.

She also spoke of her father's respect and admiration for the "humorous, modest... go-getter" that the Public Service Award memorializes.

"Although Tom Hill is a tough act to follow, the parallels are clear. I see honesty, integrity, and good will," Erin wrote.

Special recognition for "Celebrate '98" coordination efforts went to the National Park Service Upper Delaware Scenic & Recreational River's planning team, the

Wayne County Historical Society, and the Bicentennial Committees in Deerpark and Lumberland.

Heritage publications were cited in their own category as well, with kudos to the creators of the "Lackawaxen Township 200th Anniversary" book (Bicentennial Commission and Stuart Communications) and "The History of Wayne County: 1798-1998," edited by Kurt Reed, Dr. Walter Barbe and Ann O'Hara.

The Merit Award for an individual went to author and heritage activist Peggy Bancroft, and to the spirited Waymart Historical Society as an organization.

Certificates of Recognition were presented to: "History Alive" re-enactor Rich Pawling; the Damascus Heritage Barn Project; the 65-year-old active Callicoon Center Band; Historic Honesdale for achieving a National Register designation; Wayne County Chamber of Commerce for its Stourbridge Line Railroad Excursions; National Park Service Maintenance staff for restoration of the Corwin Barn at the South District Ranger Office; and to the Gillinder Brothers Glass Museum in Port Jervis. UDHA 1996-98 Past President Jayne Murray received the Alliance's Service Award.

For UDHA information, call President Emily Paulsen at (717) 729-8682. ❖

At left, Charlie Gillinder demonstrates how a vase is made with a cracked glass effect using a delicate blowing technique and quick dip into a bucket of water during a recent tour of the Gillinder Brothers Glass Factory. The family has been in the traditional glass-making business for over 130 years, 85 of them at their Port Jervis location, which also features a museum shop. Gillinder Brothers received a UDHA Award of Recognition. (Ramie photos)

# Upper Delaware River Profiled In PA 'State of the Rivers' Report

The Upper Delaware Scenic and Recreational River was among 10 waterways selected by the Pennsylvania Organization for Watersheds and Rivers (POWR) to highlight in its "1998 State of the Rivers Report," released on Nov. 7.

The Upper Delaware Council submitted the nomination to POWR, a five-year-old organization devoted to the protection, sound management, and enhancement of the Commonwealth's water resources.

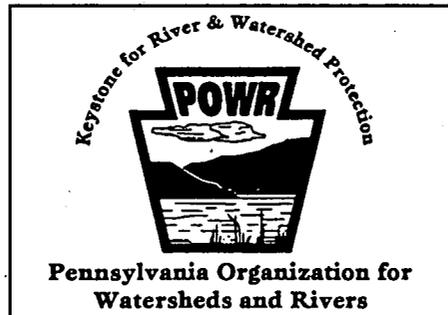

POWR's report brings state-wide recognition to the efforts to address pressures and threats that are common to many Pennsylvania waterways.

In addition to the Upper Delaware, the nine other selected entries are the Upper Susquehanna/Lackawanna River, Youghiogheny River, Bennet Branch Sinnema-honing Creek, Big and Little Elk Creeks, Loyalhanna Creek, French Creek, Tobyhanna Creek, Ridley Creek, and Turtle Creek.

The "1998 State of the Rivers Report" is being circulated to PA watershed associations, conservation organizations, legislators, agencies, and media.

The Upper Delaware River's entry describes the river segment's PA-NY border location, its federally-protected status, the "unspoiled natural area," and diverse recreational opportunities.

*"Because the region possesses such a*

*variety of interests and the vast majority of the land is in private ownership, the management plan for the Upper Delaware is quite different from those which guide other systems that are managed by the National Park Service under the Scenic Rivers designation,"* the report states.

*"The Upper Delaware was actually the first river in the country to be managed through a real partnership among federal, state and local governments. The challenge of this plan is to find effective applications of the partnerships that protect the resources of the corridor yet at the same time protect interests of the many stakeholders and private property owners."*

The responsibilities of the Upper Delaware Council, formed in 1988 to oversee implementation of the River Management Plan, are then outlined in the report.

*"...The UDC has been able to ensure that any actions that impact the river corridor are consistent with the management plan. In addition, the UDC has been able to quell the greatest fears that private property owners would lose their property or property rights under the plan. To date no such actions have occurred nor are they planned."*

*"The UDC's efforts have been so successful that the plan adopted for the Delaware is now used as a model for similar efforts across the country. The Upper Delaware today, better than ever before, provides for uses of the river by the many visitors who are attracted to the region yet at the same time protects the privileges of local residents. At the same time the mission of the Wild and Scenic Rivers Act remains intact. The Upper Delaware continues in its free flowing condition and is managed in a fashion that provides benefits for both present and future generations to enjoy." ❖*

One spirit keen for its next stage  
Indulged in winter reverie

Not like other years, tossing for weeks  
Next morning both lids shut  
Indulged in winter reverie  
This year the rippling pond went by halves

To the Upper Delaware Council:

After growing up near Narrowsburg, within a mile of the Delaware River and spending many hours swimming in it, this remains as a special remembrance for me.

We lived next door to our Grandfather's house, on the New York State side. His mother and our Great-Grandmother, Kathryn Dexter, lived directly across the river on the Pennsylvania side, in the house which now belongs to Barbara Yeaman.

When the river was frozen solid, our Grandfather would take my sister Jean and myself for a walk across it, to visit that lady. It must have been solid, because no one seemed at all concerned about it being unsafe.

Respectfully Submitted,  
Marie F. Smith  
Medford, NY

## Eel Advisory Lifted

State officials responsible for monitoring Pennsylvania waterways and protecting public health have lifted a fish consumption advisory for American eel caught in the Delaware River in Wayne County near the New York border.

The "Do Not Eat" advisory, originally issued in 1995, has been discontinued in 1999, according to the PA Department of Environmental Protection (DEP).

Samples of the fish taken over the past two years have shown that the eels in this area no longer exceed federal Food and Drug Administration guidelines for chlor-dane.

Anglers should properly clean, skin, and trim any fish they catch to reduce their exposure to contaminants. When preparing fish, remove the skin before cooking. Trim the fat and broil or grill the fish to allow any fat to drip away. Juices and fats that cook out of the fish should not be eaten or reused for cooking other foods.

# UDC Quiz: Test Your Acronym Acumen

Keeping up with the business of the Upper Delaware Council can be an outright challenge for the acronym-impaired.

The phrase "alphabet soup" often has merit when our members are in the throes of discussing programs, agencies, regulations, organizations, and anything else that can be reduced to a few convenient letters.

Congratulations to all who ace this quiz. Success means you're officially one of us.

# PA Planners Honor Upper Delaware Council

The Pennsylvania Planning Association (PPA) bestowed its "1998 Outstanding Planning Award for Plan Implementation" upon the Upper Delaware Council during the state chapter's Annual Conference in Philadelphia October 6.

The award cites the UDC's leadership role in carrying out the goals and objectives of the Upper Delaware Scenic and Recreational River Management Plan.

It lauds the unique partnership of local, state, and federal interests which have worked together since 1988 to protect the resource as well as the rights of the people who live in the river corridor.

Nearly 350 conference participants and guests attended the Awards Luncheon held at Philadelphia's Doubletree Hotel to recognize the plans, programs, projects, and people that exemplify Pennsylvania planning excellence.

Also honored in major categories were the Lancaster Township Strategic Comprehensive Plan; Montgomery County's Open Space Program; the public-private Lititz Run Watershed Initiatives; and a University of Pittsburgh graduate student project concerning brownfields redevelopment in Pittsburgh.

For individual achievement, PPA presented Leonard W. Ziolkowski, deputy director of the Economic Development Council of Northeast Pennsylvania, with the "Distinguished Service Award to a

Upper Delaware Council Executive Director Bill Douglass, at right, and Pennsylvania Planning Association Northeast Section President Peter Wulfhorst, display the plaque and framed certificate awarded to the UDC for receiving PPA's "1998 Outstanding Planning Award for Plan Implementation" at a celebratory luncheon in Pittston hosted by the Northeast Section on October 16. The tributes are on display at the UDC office. (Ramie photo)

Professional Planner"; while conferring its "Distinguished Service Award to an Elected Official" to Harrisburg Mayor Stephen R. Reed.

The Upper Delaware Council's nomination was prepared by Peter Wulfhorst, Pike County Community Planning Director, vice-chair of the Upper Delaware Citizens Advisory Council (CAC), and first alternate

CAC representative to the UDC.

In his capacity as president of the Northeast Section of PPA, Wulfhorst also arranged an October 16 luncheon at the Victoria Inn in Pittston, Pa. to honor the Council and fellow regional award recipient Len Ziolkowski.

PPA is a chapter of the American Planning Association. ❖

## "CANAL TREK", continued from Page 3

a slick advertising campaign to stimulate growth. If we take a good hard look in our own backyards we might recognize what we already have. This trek showed that with a little digging, we can unearth a lot of potential, maybe even a gold mine from a coal mine. ❖

To learn more about the preservation activities and membership of the D & H Transportation Heritage Council, call Peter Osborne at the Minisink Valley Historical Society, (914) 856-2375, or Sandra Schultz at the National Park Service, Upper Delaware Scenic and Recreational River, (717) 729-8251. They can direct you to a contact in your community.

## UDC Staffer Promoted

Carol Coney, formerly secretary of the Upper Delaware Council, was promoted to the new position of Office Manager effective October 1, 1998.

Ms. Coney, a Narrowsburg resident, has been employed full-time by the Council since May 6, 1992. ❖

The Upper Delaware Council, Inc. meets on the first Thursday of every month at 7:30 p.m. at the Tusten Town Hall, Narrowsburg, NY. Three standing committees: Operations, Water Use/Resource Management, and Project Review, meet on the third and fourth Tuesdays of every month at the UDC office, 211 Bridge Street, Narrowsburg, across from the Town Hall. All meetings are open to the public. Call (914) 252-3022 for specific meeting dates and agendas.
